

**STRIVING FOR EXCELLENCE
EVERY CLIENT.
EVERY DAY.**

One of the most important aims of Peniel's treatment approach is to treat each client as an individual and make provision for their specific needs. Peniel's medical department is no exception. We strive to treat each client with the dignity and respect they deserve while maintaining a professional relationship. Each client's well-being is our utmost priority.

CONTINUITY OF CARE

Peniel's Medical Services Department works with each client from their first day of treatment until their last. Each client leaves treatment educated to live a healthy lifestyle and equipped to address future medical concerns.

**Total recovery is about
so much more than
only mental health.**

Using proven treatment methods, the goal of Peniel is to see broken lives restored and true change take place.

Peniel's aim to return clients back into their communities prepared not only to live sober lives but lives of integrity and purpose.

*If you or someone you know may be experiencing
difficulty coping with life, please contact us.*

PENIEL

Transforming Broken Lives

MEDICAL SERVICES DEPARTMENT

The overall goal of the Peniel Medical Services Department is to oversee and maintain the comprehensive health of each of our clients. We work diligently to ensure that every client is able to maintain physical stability while seeking emotional, psychological and spiritual healing.

Our Highly Qualified Team

DR. LAWRENCE BEATTY

With more than thirty years of experience, Dr. Beatty is well-qualified in both emergency and family medicine. He is a skilled practitioner competent in various aspects of medicine.

Though he operates his own practice in Johnstown, he has made himself readily available to Peniel and volunteers his time to see clients in treatment. He is integral in helping to provide continuity of care and ongoing attention to every client's medical need.

PENIEL CLIENTS RECEIVE THE ABSOLUTE BEST IN MEDICAL CARE. METICULOUS ATTENTION AND CONSIDERATION IS GIVEN TO EACH CLIENT'S EVERY HEALTH NEED.

QUALIFIED STAFF

The medical department is made up of skilled nurses working in conjunction with Peniel's volunteer physician. These licensed professionals are well equipped to assess patient needs and recommend the proper course of action.

INDIVIDUAL CARE

Each client is provided the highest level of personal attention and treated with the utmost respect and consideration.

STAYING RELEVANT

In addition to normal duties, the medical department is also tasked with conducting various staff education seminars such as CPR training, communicable disease awareness and other education as needed. This allows Peniel to remain on the cutting edge of care for our patients.

Once a client has met the guidelines for admission and has arrived, staff from the medical department meet with him/her to complete a full assessment. Clinicians gather family and individual health history and make arrangements for the client to have a preliminary visit with the physician.

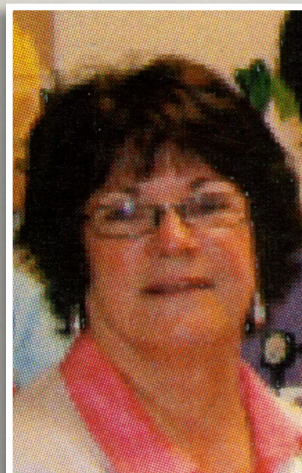

As they progress through treatment, their health is continuously monitored to ensure that their needs are being met. Clients are also educated about their medicines as well as pertinent health issues. They are strongly encouraged to become involved in their own medical care.

VICTORIA COLEMAN, RN

Victoria is a graduate of the Conemaugh School of Nursing. Among her expertise in the medical field, includes trauma care with experience in the Intensive Care /Coronary Care Unit at Memorial Medical Center and with physician groups throughout the community.

Joining the Peniel Medical Services team in 2007, she continues to expand her proficiency, training in post traumatic stress disorders and leadership nursing skills. Victoria serves with great efficiency and kindness.

PATRICIA EAGLESON, RN, MSN, CRNP, FNP-BC

For many years, Patricia has been faithfully serving at Peniel. This highly skilled expert provides health promotion education, completes entry history and physical evaluations and coordinates resident's medical care. She is also equipped in emergency preparedness.

During her tenure at Peniel, she has obtained her Master's degree while simultaneously serving as a Registered Nurse Practitioner at Memorial Medical Center. Patricia brings a wealth of experience, training and unparalleled professionalism to the medical services team.
